Hi All,

Attached is a revised map with the boundaries more aligned. I will spare the details, but this required Melody referring to topo maps to try to align things better. She'd dealing with multiple data sources that don't always overlap perfectly.

- Does Acoma and Laguna need to be in the legend if they're not technically on the main map?
- There's a few patches of yellow tribal land that doesn't have lines above them indicating to which tribe the land belongs to. Are we missing that information or are the lines just missing?
- Do we want to distinguish the difference between not researched vs. Region 9 mines?

Good afternoon everyone. Please provide any comments on the attached map by next Tuesday.

Thanks
Kevin

Kevin,
See what you think of this map. What title would you like?
